

## **P-01.60 Environmental Management System Policy**

The purpose of the Environmental Management System Policy is to minimize the environmental impact of our operations and to comply with all laws and regulations in order to contribute to the protection of the environment, to continuously improve performance by reducing our environmental footprint, and to leave behind a habitable and clean environment for the future generations.

Logo acts in accordance with the following principles in order to ensure the sustainable success of the Environmental Management System:

- Developing people-friendly and environmentally-conscious projects,
- Operating in compliance with all environmental legislation and other obligations in force, and developing practices beyond legislation,
- Evaluating the environmental risks and impacts of all Logo operations from a risk-based approach and sustainability perspective, and establishing action plans in order to reduce and eliminate the effects of these risks,
- Minimizing waste and resource consumption,
- Fulfilling the Environmental Management System's requirements and ensuring its continuous improvement,
- Reducing waste at the source in all offices, and recycling as much as possible,
- Raising awareness on climate change and supporting the cause, and in this respect, reducing energy consumption and intensity, and greenhouse gas emissions, and increasing energy efficiency,
- Promoting efficient use of natural resources; water being the top priority,
- Protecting natural resources by using technologies that have minimum impact on the environment, considering technical and economical capabilities,
- Reducing natural resource use, preventing pollution and increasing energy efficiency,
- Ensuring the recycling of waste such as paper and plastic generated during operations, and designing and implementing a recycling action plan,
- As per our continuous progress efforts, minimizing the use of natural resources and increase environmental awareness,
- Reducing our overall impact on environment by taking into consideration the environmental impact of our projects,
- Managing air emissions in compliance with legal requirements,
- Discharging wastewater conforming to the legal framework and to improve water quality in accordance with international standards,

- Establishing emergency action plans to reduce and mitigate the environmental, health and safety consequences of accidents,
- Creating an environmentally-conscious corporate culture and raising awareness in cooperation with all our employees, customers and stakeholders,
- Raising employee and stakeholder awareness on environmental issues,
- Encouraging employees, business partners, and all members of Logo ecosystem to operate in an environmentally responsible way,
- Preferring suppliers who demonstrate environmentally-conscious performance,
- Setting measurable targets on short and long-term environmental performance, and improving performance in line with these targets,
- Getting support and contribution from all stakeholders to achieve Logo's environment related targets.
