

## Logo approved ecosystem solutions suggested price list - one-time

Valid from January 5, 2024

### General descriptions

1. All price and price-related conditions in this price list (including but not limited to license prices, training prices and training durations) are advisory only and are non-binding by Logo.
2. All prices are in Turkish Lira (TL) and do not include VAT.
3. Prices may differ depending on valid Logo Enterprise Membership (LEM) contracts in progress, except for the main package and transition package prices.

#### – LEM (Logo Enterprise Membership)

4. Lem is a subscription system which provides customers the latest version of the product with new features and performance improvements, also enables customers special prices for user increase, employee increase and modules when desired to be purchased.
5. A 1-year LEM is free for new package purchases. When switching to other products;
  - When switching to other products in the same segment, with or without a fee, the LEM validity for the previous product will be transferred to the new product (with the same start and end dates).
  - When upgrading to upper segments with a fee, 1-year free LEM is assigned to the new product starting from the switch date.
6. The LEM is valid for one year. The renewal period will start as of the end date of previous LEM.
7. Users who renew their LEM subscription before or within 30 days after the end date and in a regular manner may benefit from the loyalty discount and get LEM with advantageous prices.
8. If the LEM subscription is not valid, additional products purchased with “prices applied for a valid LEM” cannot be installed.
9. For LEM subscriptions that are not renewed within 30 days following the end date, a Retrospective LEM should be purchased. The price of the Retrospective LEM is 10% more than the price of the Standard LEM.
10. The price of LEM is calculated as per the latest configuration in the product (main package, module, user/employee/firm increase). User/main package/module/firm increases are included in the price calculation of LEM as of the date of purchase. The price of LEM is calculated considering the end date of the LEM subscription for options (modules). For every module purchased at least one year prior, the duration from the month in which the 1-year period expired until the end date of the Standard LEM subscription is checked and the remaining months are included in the LEM price calculation.
11. Service, installation and upload prices of Logo Business Partners are not included in the LEM prices.

#### – Training

12. Training sessions regarding the use of products are organized by certified business partners. Requests for diagnostics, reporting and customization are evaluated separately.
13. It is strongly recommended that you only participate in training sessions provided by Logo business partners and certified training specialists listed on the Logo corporate website ([www.logo.com.tr](http://www.logo.com.tr)).

### –Descriptions

1. Approved ecosystem solutions are solutions developed by the Logo solution development partner and integrated with Logo products. Solutions can only work in integration with the Logo products mentioned above.
2. Retail T-Pos; It is a solution developed by Kalem Software. It is a solution that enables very simple and fast sales of products with or without barcodes on the touch screen or a normal PC.
3. Fuel Management; It is a solution developed by Kalem Software. Thanks to its integration with Logo products, it is a solution where all market and fuel transactions of the station can be presented and reported to the customer with a single program.
4. DocPlace; It is a solution developed by Kets Software. It is a rich document management system. It provides easy editing and storage of critical documents. While DocPlace Basic can only work with ERP, DocPlace PRO can work without being connected to ERP.
5. Collector; It is a solution developed by Mare Software. It provides data transmission to different companies, data transfer between group companies, cross receipt and document sending between defined companies.
6. Bank Statement Transfer; It is a solution developed by Mare Software. It is an application that enables the transfer of bank statements to Logo in excel format.
7. DEYS; It is a solution developed by Prolog Software. It is a fully integrated warehouse management automation that has been developed to solve the current problems of small and medium-sized companies in warehouse management and can work with serial and ean barcodes supported by hand terminals.

### – LEM

8. The LEM price is calculated over the LEM rate of the current product which is connected to the ecosystem solution.

### – Product transitions

9. In the transitions of the main package in the hands of the user to the parent product, the price difference between the current list prices of the approved ecosystem solutions connected to the main package and the current list prices of the parent product to be switched is taken.
10. Current FDA product users receive a 10% discount on upgrades to the Collector product.

## Logo approved ecosystem solutions suggested price list - subscription

Valid from January 5, 2024

### General descriptions

1. All price and price-related conditions in this price list (including but not limited to license prices, training prices and training durations) are advisory only and are non-binding.
2. All prices are in Turkish Lira (TL) and do not include VAT.
3. Approved ecosystem solutions offer monthly or annual use. Monthly and annual prices for the main package and user increases are indicated in the price list.
  - Training
4. Training sessions regarding the use of products are organized by certified business partners. Requests for diagnostics, reporting and customization are evaluated separately.
5. It is strongly recommended that you only participate in training sessions provided by Logo business partners and certified training specialists listed on the Logo corporate website ([www.logo.com.tr](http://www.logo.com.tr)).

## –Descriptions

1. Approved ecosystem solutions are solutions developed by the Logo solution development partner and integrated with Logo products. Solutions can only work in integration with the Logo products mentioned above.
2. The additional user increase and modules that they will receive within the scope of the subscription during the year are calculated with the 'annual price / 12 \* month remaining to the subscription renewal period' without the requested month being included in the calculation and included in the main package license.
3. Gastropos solution is a solution developed by Zensoft Software. It provides digitalization of all ordering processes in cafes and restaurants. Package differentiation is available as Basic, Standard and Enterprise. There is a maximum of 6 users in the Basic package and a maximum of 21 users in the standard packages.
4. Fixidesk solution is a cloud-based solution developed by Imgesoft and provides effective management of after-sales service processes. Package differentiation is available as Basic, Standard and Enterprise. There is a maximum of 10 users in the Basic package and a maximum of 20 users in the standard packages.
5. Retail T-Pos; It is a solution developed by Kalem Software. It is a solution that enables very simple and fast sales of products with or without barcodes on the touch screen or a normal PC.
6. Fuel Management; It is a solution developed by Kalem Software. Thanks to its integration with Logo products, it is a solution where all market and fuel transactions of the station can be presented and reported to the customer with a single program.
7. DocPlace; It is a solution developed by Kets Software. It is a rich document management system. It provides easy editing and storage of critical documents. While DocPlace Basic can only work with ERP, DocPlace PRO can work without being connected to ERP.
8. Collector; It is a solution developed by Mare Software. It provides data transmission to different companies, data transfer between group companies, cross receipt and document sending between defined companies.
9. Bank Statement Transfer; It is a solution developed by Mare Software. It is an application that enables the transfer of bank statements to Logo in excel format.
10. Online Bank Statement Transfer; It is a solution developed by Mare Software. It provides instant transfer of User and POS statements. It works in integration with Logo GO, Logo Tiger, Logo Netsis product families. It can be used with unlimited banks, unlimited User transactions, unlimited POS transactions, unlimited companies. It cannot work without an offline bank statement transfer solution.
11. Fistant bank User management; It is a solution developed by Kronosoft. Works ERP independently. It is a solution that allows businesses to instantly view the instant balances, User movements and POS movements of their Users in all banks through a single application and to be used independently of time and place.
12. Narbulut data backup; It is a solution developed by Narbulut Software. It allows you to access your data quickly and easily in case of disasters such as file losses, user errors, cyber attacks, system and hardware failures on your computers and servers. Each main package is valid for one user. The capacity shows the backup area belonging to the user. For capacity increases, the main package must be purchased first. In order to continue using monthly subscriptions, a subscription renewal order must be entered every month. It is not possible to switch from annual subscription to monthly subscription. There may be a transition from monthly subscription to annual subscription.
13. DEYS; It is a solution developed by Prolog Software. It is a fully integrated warehouse management automation that has been developed to solve the current problems of small and medium-sized companies in warehouse management and can work with serial and ean barcodes supported by hand terminals.
14. Payer Marketplace Integration is a solution offered through logo.cloud, developed by Payer software, which provides a strong integration between popular marketplaces and e-commerce stores, enabling the management of all products sold through a single platform.
15. Masraff | Intelligent Expense Management Platform; Developed by Sorusana IT, Masraff is a solution that is sold through logo.cloud annually with a minimum of 10 users. With Masraff's cloud-based and AI-supported platform, businesses can track their expense budgets in real time, and benefit from features such as automatic and fast expense entry, mobile approval, and many other conveniences.
16. PirCloud | Online Project-Site and Business Management Platform is a solution developed by Pir Software, which is priced annually and sold through logo.cloud. PirCloud connects project and site areas to the company headquarters, providing process integrity and a high level of digitalization between the headquarters and project sites. It provides time savings and significantly increases efficiency.
17. Payer Cargo Integration is an approved ecosystem solution developed by Payer Software, a solution development partner. It is a cloud-based service and support for the product is provided by the solution development partner. It integrates with Logo GO, Tiger, and Netsis ERP solutions, Logo j-Platform, Cloud ERP, and WMS Platform solutions. It has integration with Aras, City, Hepsijet, MNG, PTT, SENDEO UPS, and Yurtiçi cargo companies.

## – Product transitions

18. When transitioning to a new product, the price difference between the current list prices of the approved ecosystem solutions connected to the main package and the current list prices of the switched product is taken.
