− Explanations

1- The Logo Cloud ERP service is a cloud-based service (SaaS) which is used through a web browser. Users with Internet connection can access this service at any time from anywhere. The Cloud ERP service does not require a system or installation investment. It can be used immediately after subscription. Since the versions are automatically upgraded, the Cloud ERP service stays up-to-date all the time.

2- Since Logo Cloud ERP service is a cloud-based (SaaS) service, membership can be created with a monthly/yearly rental fee within the framework of the subscription model. To purchase Cloud ERP, you can start using it by creating a subscription on the logo.cloud.com.tr website and completing the payment with a credit card.

3- You can try the Cloud ERP service free of charge for 14 days. To start your trial period, please visit: https://logo.cloud/servisler/erp-yonetimi/

4- Cloud ERP annual subscriptions are 17% more advantageous than monthly subscriptions. Annual subscriptions are calculated over a 10-

5- Cloud ERP is priced per user. You can order packages for as many users you want, subject to no user limit. Provided that you do not exceed the number of users defined in the main package, you can order any amount of modules and customize your service. e-Solutions are priced based on the number of businesses. You can order e-Solution add-ins in any amount without exceeding the number of businesses owned.

6- Users who purchased monthly/annual subscriptions for Cloud ERP will have a monthy/annual subscription license. Additional user increase features and modules to be purchased during the subscription period are calculated with the formula, "unit price / 365 * number of days left until subscription renewal date" and included in the total price of the package.

7- The Cloud ERP Basic Package includes Materials Management (stock inventory monitoring, monitoring and reporting materials with series/lots, monitoring current product costs, product classification and reporting), Purchase Management (creating manual or automatic purchase orders, purchasing, monitoring dispatches and invoices), Sales Management (creating sales orders, sales, monitoring dispatches and invoices), Finance Management (defining current account, bank, cash register, checks/promissory notes, collateral tools, creating check/promissory note payment and collection plans, tracking the transactions in current accounts with the multiple currency system, monitoring debts/receivables, creating payment and collection plans), General Accounting (defining and monitoring account plans, mirror operations with mirroring templates, instant accounting of the transactions in other modules, calculating foreign exchange differences for accounting transactions with foreign currency) modules.

8- In addition to all of the features in the Basic package, Cloud ERP Standard also includes Advanced Materials Management (creating variant breakdowns of products, defining different product features or feature sets, comparing inventory results and ensuring stock balance with warehouse inventory process, distributing services to material costs with cost distribution receipts, transferring stock between materials with material transfer process), Fixed Asset Management (defining fixed assets in separate categories, grouping fixed assets by features, tracking movements of fixed assets from entry to exit from the business, depreciation valuation for fixed assets), Demand Management (creating individual or bulk purchasing orders for requests, managing requested quantities according to fulfillment types, tracking purchasing files and purchasing requests), Fast Production (automatic material receipts for mixed parcel, product and material lines with fast production receipts, creating disassembled material receipts), Offer/Contract Management (creating purchasing and sales offers, creating purchasing and sales contracts), Notification and Approval Management (defining user notifications, assigning defined notifications to users), Sales Console (user-friendly interface where sales transactions can be made quickly and easily, adding new customers conveniently, searching existing customers, easy access to products and services from the interface by adding shortcut buttons, cash and credit card payment) modules.

− Plugins

9- Cloud ERP Budget module; It includes the features of creating an unlimited number of budget scenarios, budget revisions, budget tracking over receipts and invoices, comparison of planned amounts and actual amounts, defining analysis dimensions to distribute costs to units and projects, tracking budgets in detail in analysis dimensions.
