All Occupational Health and Safety processes are under control with eLogo OHS!

A new era starts in Occupational Health and Safety with eLogo OHS!
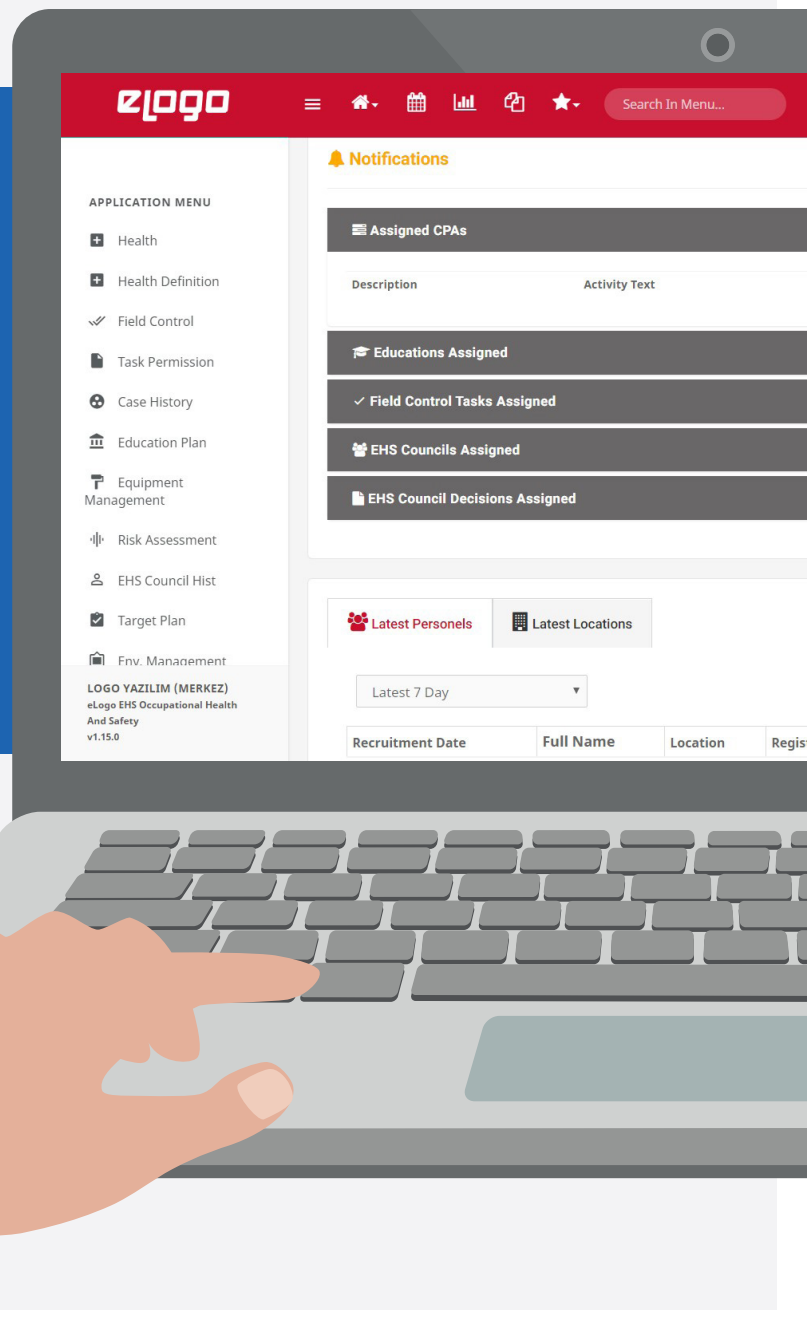

Manage all of your Occupational Health and Safety needs arising from relevant legislation and company principles with eLogo OHS solution. Fulfill both Occupational Health and Occupational Safety obligations through the digital environment easily, provide time, costs and labor savings.

eLogo

eLogo digitalizes Occupational Health and Safety operations, so you can manage all of your processes from a single point.

As Occupational Health and Safety is directly related to human life, every aspect is under legal scrutiny. Therefore it is very important to seamlessly and reliably manage Occupational Health and Safety (OHS) applications which cover a wide range including the creation of a physically safe working environment, carrying out health inspections of employees, submitting OHS data to the Ministry of Labor and Social Security and preparing e-Prescription.eLogo OHS digitalizes all of these operations, and eliminates manual operations.

In a world where all business processes are being digitalized, do we really need to manually perform OHS applications? Use eLogo OHS to manage all of your business processes from a single point; save on labor and time while staying fully compliant with legislation!

eLogo OHS Overview

- A special structure for OHS processes

- On-premise (indefinite license) and cloud usage options

- Occupational Health and Occupational Safety in a single platform

- e-Prescription application

- Approved by the Ministry of Labor and Social Security

- Data storage advantage for 10 years

- High-quality support services powered by the eLogo experience

Occupational Health and Safety scope

During a workplace's operational performance, all employees (permanent or temporary), together with subcontractor employees, visitors, customers and every other person within the boundaries of the working space, are included in the scope of OHS. Therefore it is the purpose of OHS to specify and improve all the factors which might affect the health and security of these persons.
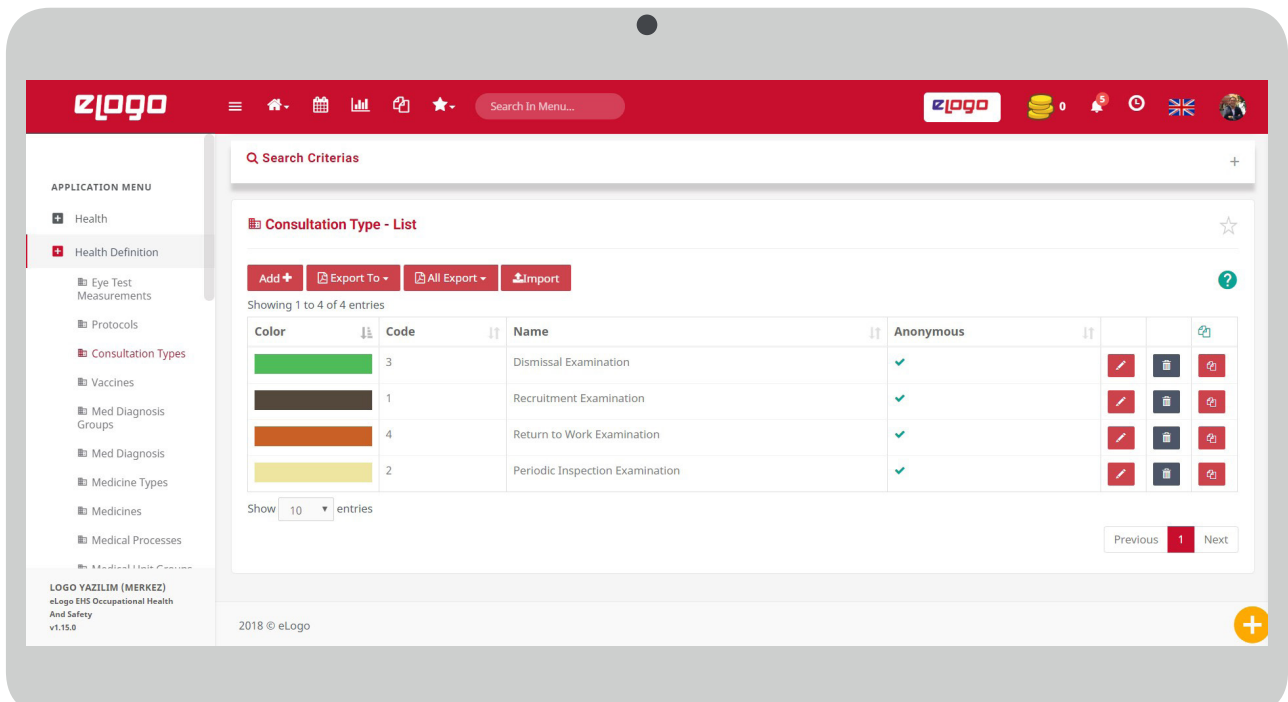

Legal context

Workplaces that are required to acquire OHS services, as per the circular published by the Ministry of Labor and Social Security (MLSS) on February 27th, 2018, are also required, from July 1st, 2018 onwards, to electronically submit data requested by the Ministry of Labor and Social Security via integrators authorized by the Ministry. Digitalizing this process brings considerable speed and convenience to OHS applications.

The eLogo OHS solution, developed in line with this purpose, can be used by workplace physicians and on-site occupational safety specialists, as well as those working at the Common Health and Safety Units.

Although not included in this scope, Common Health and Safety Units (CHSUs) and individually serving Occupational Safety specialists and workplace physicians can also utilize this solution.

Why eLogo OHS?

Designed in line with the Law No. 6331 on Occupational Safety and management systems, such as OHSAS 18001 and ISO 14001, eLogo OHS manages all processes related to occupational safety and occupational health (infirmary and e-Prescription procedures) on a web-based platform in full compliance with current legislation. In other words, all legislative changes are automatically reflected into eLogo OHS.

With multi-language support, eLogo OHS can also be used conveniently in multinational businesses. eLogo OHS also fulfills the legal obligations of submitting obligatory data to the Ministry of Labor and Social Security and storing this data for 10 years.

- Development team consisting of ministry-approved OHS specialists

- Full compliance with local legislation and management systems

- Multi-language support

- Sector-independent software infrastructure and modeling

- User-friendly interface
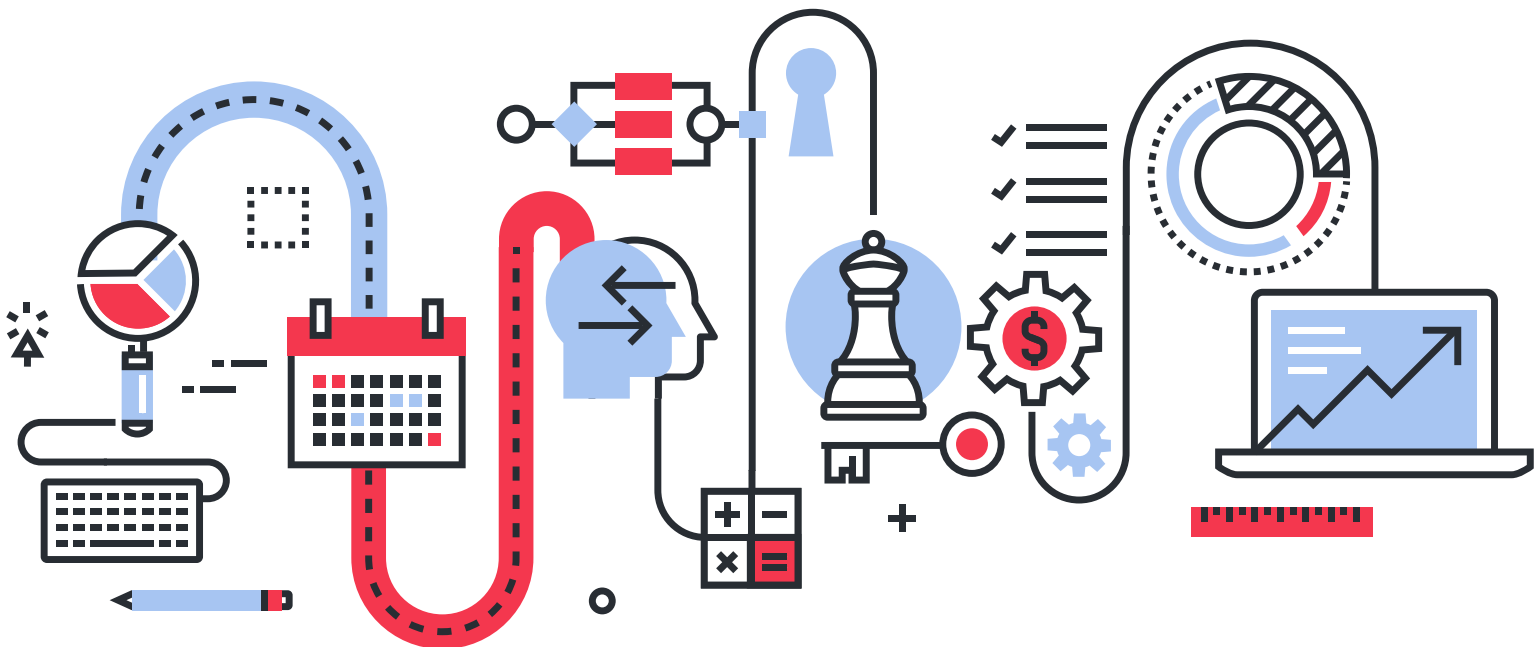

eLogo OHS: Two solutions in one package!

eLogo OHS covers both Occupational Health and Occupational Safety solutions, and allows businesses looking for a digital solution in both areas to cater for their needs from a single point. Businesses that need only one of these solutions can either purchase the Occupational Health or Occupational Safety solution separately.

Comprehensive process management

Consisting of many components, OHS processes can be managed end-to-end from a single point with eLogo OHS:

- Polyclinic examinations
- Examinations at recruitment/periodical examinations
- Field audits
- Follow-up on operations which require permission
- Follow-up on OHS committee meetings
- OHS environmental management
- Emergency plan and follow-up of emergency teams
- OHS legislation monitoring
- Follow-up on embezzled personal protective equipment
- Follow-up on periodical equipment checks
- Corrective and Preventive Action (CAPA) follow-up system
- Event/accident notifications
- Training follow-up
- Risk analyses
- Annual work plans

The eLogo OHS solution has no limitations in terms of defining users. You can create as many users as required with role-based authorization, company-based authorization and intercompany authorization sharing categories.

The eLogo OHS solution can be used either on-premise (indefinite license) or in the cloud, depending on business preferences. On-premise use only requires the installation of the solution on a local server. Cloud-based use requires no installation or server fee and the solution can be used directly. Choose the optimal method for your needs and resources, get digital with eLogo OHS!

A proactive solution against all risks

Designed for occupational safety specialists, occupational safety managers and workplace physicians with ease of use in mind, eLogo OHS enables more efficient management of observation, analysis, identification, follow-up and planning processes thanks to its advanced features.

When data is entered into the system, eLogo OHS can be used to analyze every process. These analyses identify risks and unpredictable outcomes, based on which proactive measures can be developed to improve processes and mitigate risks. In addition, company-specific risk databases can be generated and place and activity-based risk scoring can be performed for risk analysis. Risk assessment forms and other reports can be easily created in the system.

Effective employee monitoring

Following up on the documentation related to health reports, training statuses and work accidents of every employee in a business means a considerable workload and the need for a physical archive area.eLogo OHS enables the display of these documents in the system which makes for an easier and more effective process, saving time both for employees and managers.

With eLogo OHS software you can also define training sessions provided and send these to the Ministry of Labor and Social Security directly through the system. In addition, training certificates and annual work plans can be converted into MS Word, Excel or PDF formats and printed or stored in the system.

The solution which facilitates the jobs of workplace physicians

Along with the occupational safety applications, eLogo OHS also includes occupational health functions catered for workplace physicians. Processes such as recruitment, return-to-work, periodical examinations, polyclinic examinations and creating prescriptions/e-Prescriptions can be performed on the Infirmary module of eLogo. Work accident notifications can be made using the Event/Accident Notification module.

While the workplace physicians can easily print the APPENDIX-2 form and prescriptions through the system, they can also manage appointments. Workplace physicians can also define appointment frequencies directly on eLogo OHS, which facilitates orderly management of all health check appointments in the business. Workplace physicians are also reminded automatically of due dates for examinations, vaccinations and appointments.

User-friendly design

Transactions can be completed in a short period of time, and tracked easily with eLogo OHS, which is designed considering the ease of use for occupational safety specialists and workplace physicians.eLogo OHS can work via internet browsers using the latest technologies.
