# The gateway to the digital world for efficient project management

### Logo j-Platform Project Portal

# Digitalize every project with Logo j-Platform's Project Portal

For companies with large numbers of projects and intense project workloads, software support is very important. The Project Portal module, which works within the web-based Logo j-Platform ERP solution and is designed for medium and large scale businesses, enables businesses to carry out all of their projects, smoothly and in a coordinated way.

## Logo j-Platform Project Portal

### The key to successful project management: Logo j-Platform Project Portal

Running multiple projects at the same time with many stakeholders is the common point of many businesses operating in different sectors such as educational institutions, architecture offices, and logistics companies. Every project comes with different content, scope, targets, and teams which makes managing projects manually very difficult.

The Project Portal module, which works as part of the Logo j-Platform solution, allows the management of all projects in the digital environment and integrated with ERP data, therefore rendering the whole project's processes to be more efficient and reliable. The module can be used in every business which performs sector-independent project management and is the key to successful and standardsbased project management.

Project teams become more efficient with Logo j-Platform Project Portal module!

## What are the advantages of Logo j-Platform Project Portal for your business?

Project management from a single point

Ability to simultaneously manage multiple projects with full control

Increase the efficiency of project teams

Continuous control on project processes

Efficient management of project resources

### Efficient coordination and management to meet the project needs

Businesses that run multiple projects simultaneously, project teams should be coordinated together and there must be absolute control over targets and processes at all times, in order to successfully complete projects. The Project Portal, which runs on the webbased Logo j-Platform ERP, allows monitoring all of your projects from a single point for completely digital project coordination and control. This makes the instant monitoring of project progress possible, as well as problems encountered and any possible delays.

*Efficiency increases are made possible by monitoring all projects from a single point!* 

#### Planning and analysis tools for efficient projects

Planning tasks and workloads of project teams is a critical stage for projects. Logo j-Platform Project Portal module allows you to assign tasks, define control units and generate timelines. In addition, project develops becomes possible to run efficiency analyses and necessary changes are applied in a timely manner.

End-to-end digital project management!

#### ERP compliance

The ability to plan and run projects according to available resources is one of the key factors to ensure project success. Therefore, using the most up-to-date information from the planning stage makes generating and running more reliable projects possible. The Project Portal module, which runs within the Logo j-Platform ERP solution, ensures that all data flows remain up-to-date at all times.

Successful projects thanks to accurate and up-to-date data!

# What are the advantages of the Logo j-Platform Project Portal module for your business?

A better decision-making mechanism

Project deliveries on time and within budget

Efficient cooperation among all shareholders

Consistent project data thanks to ERP integration
